## LARGE CAPACITY SYSTEM

In today's working environment, printing projects need to get done faster and more cost effectively than ever. For Corporate Reproduction Departments and Print-For-Pay businesses, that challenge just got easier. The Gestetner LS3000 Large Capacity System works with a variety of our CopyPrinters to handle 3,000 sheets of paper at one time, dramatically increasing productivity while shortening downtime between printing jobs.

**Satisfying the market's demands.** A large capacity paper tray system is critical to satisfying the demands of Corporate Reproduction Departments, Print-For-Pay businesses and high-volume users. The Gestetner LS3000 does just that and more. The Large Capacity Input Tray holds 3,000 sheets of paper at one time, while the Large Capacity Output Tray stacks those sheets until you're ready to use them. This large capacity tray system cuts down on the time you spend loading and unloading paper to complete your job.

**Cut your costs.** Less time between jobs means higher productivity. And, since time is money, it's clear to see that the LS3000 offers outstanding cost-saving benefits by handling all your print jobs faster and easier than ever before.

**Ensuring quality.** The LS3000's state-of-the-art technology ensures proper paper alignment, virtually eliminating any set-off problems from occurring. The Large Capacity Output Tray lowers automatically to maintain a uniform height, allowing the printed sheets to stack correctly. Printed sheets are easily removed from the Output Tray by simply releasing the side guides and end plate. And, adding paper to the Input Tray couldn't be easier—just stack in the tray and you're done.

**Handles a variety of paper stocks.** Now you don't have to limit yourself to ordinary paper stocks. The LS3000 handles a large variety of paper types, weights and sizes up to 11" x 17" and envelopes up to 10" x 13" with efficiency and ease. It even handles NCR forms and other specialty type papers. Located conveniently at the top of each tray, side guides can be quickly adjusted to accommodate the different paper sizes.

**Rush jobs—no problem.** There's no need to stop one job for another with the LS3000. Simply release the lever to detach the Large Capacity Input Tray and run the rush job through the connected Gestetner CopyPrinter paper tray. When the rush job is finished, just reconnect the Large Capacity Input Tray and continue with the previous job.

For more information about the Gestetner LS3000, contact your authorized Gestetner dealer.

### Specifications

Mainframe Configuration	Large Capacity System LS3000 Consists of two units: Large Capacity Input Tray (LCIT) and Large Capacity Output Tray (LCOT) The LCIT can be used independently
Input tray paper capacity	3,000 sheets (20 lb.)
Output tray paper capacity	3,000 sheets (20 lb.)
Minimum paper sizes	5.1" x 7.1"
