Plug-in for HP Web JetAdmin®

## Introducing Gestetner Integration for HP Web Jetadmin®

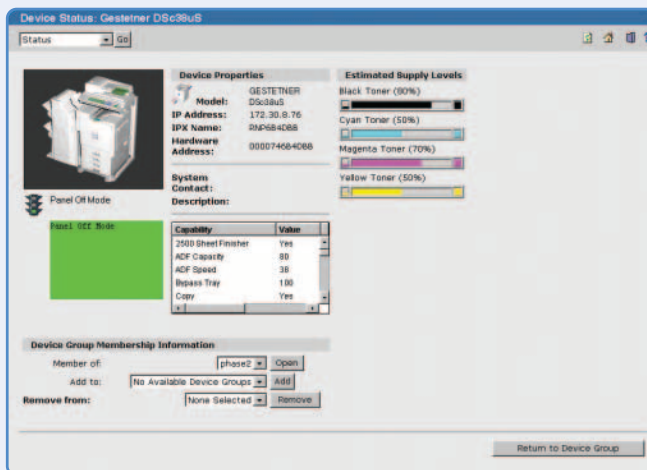

### GESTETNER PLUG-IN FOR HP WEB JETADMIN®

We at Gestetner know how important it is for your IT support staff to easily and efficiently manage networked peripherals in your heterogeneous printing environment. Seamlessly integrating with your network support infrastructure is one of our top priorities. To that end, Gestetner has teamed with Hewlett Packard to develop device “plug-ins” which allow HP Web Jetadmin users to manage select Gestetner Printers and Multifunctional Devices.

That’s right...Simply download the Gestetner plug-in for HP Web Jetadmin software from [www.gestetnerusa.com](http://www.gestetnerusa.com) and load it on your Web Jetadmin server. Once the plug-in is loaded, select Gestetner peripherals can be monitored, managed, installed and configured through HP Web Jetadmin – seamlessly and reliably!

### POWERFUL AND ROBUST FUNCTIONALITY

The Gestetner plug-in for HP Web Jetadmin provides full graphical support on select models. This means you can remotely view a true bitmap representation of a Gestetner device including the exact accessory configuration and status.

Following are some additional features and functionality available to you once the Gestetner plug-in for HP Web Jetadmin is installed:

- ▶ Device Discovery – Support for pre-configured, DHCP enabled, and IPX configured devices
- ▶ Graphic Error Overlay Support – Visually illustrates a device problem or error and displays status and/or error message on a simulated front panel

- ▶ Device Groups – Create groups according to your management requirements (i.e. floor, department, network segment)
- ▶ Device Configuration – Remotely configure Gestetner devices individually or by group
- ▶ Device Capabilities – Identify installed accessories and their capabilities, RAM, hard disk space, print and scan speed, etc.
- ▶ Paper Levels – paper level support for all installed paper inputs
- ▶ Toner Levels – Graphical and text message support for both color and black & white
- ▶ Alerts – All Gestetner devices’ alert capabilities are available through HP Web Jetadmin
- ▶ Device Statistics – Device counter (i.e. fax, color, B&W, printer, copy, and total counters) and network communications statistics
- ▶ Scheduled Device Statistics Exporting – ability to schedule or do immediate exporting of device statistics information (i.e. counters) to either a CSV or XML file format
- ▶ Device Embedded Web Server – ability to access any Gestetner device’s embedded web server via HP Web Jetadmin

# Gestetner Plug-In for HP Web Jetadmin®

## DEPENDABLE SOFTWARE YOU CAN TRUST

All Gestetner plug-ins for HP Web Jetadmin are developed using software development kits designed by HP. In addition, every plug-in is certified by HP as compatible with HP Web Jetadmin when used with select Gestetner printers.

## ALWAYS A LEADER

Gestetner is the first Document Solutions provider in the industry to offer this level of functionality within the HP Web Jetadmin application. In addition, Gestetner also offers enhanced support solutions for applications such as HP OpenView, CA Unicenter and Tivoli NetView to name a few.

For more information contact your authorized Gestetner dealer.
